Respected author team of Ken Miller and Joe Levine are back with a new edition of biology books to inspire students to interact with trusted and up-to-date biology content. The authors' unique storytelling style engages students in biology with a greater focus on written and visual analogies.

Early critics of the philosophy of eugenics included the American sociologist Lester Frank Ward, the English writer G.K. Chesterton, the German-American anthropologist Franz Boas, who argued that advocates of eugenics greatly overestimate the influence of biology and Scottish tuberculosis pioneer and author Halliday Sutherland.

A green future: Our 25-year plan to improve the environment sets out what we will do to improve the environment within a generation.

Unraveling trauma in the body, brain, and mind: A revolution in treatment now in 17 languages. In this culmination of his life's work, Peter A. Levine draws on his broad experience as a clinician, a student of comparative brain research, a stress scientist, and a keen observer of the naturalistic animal world to explain the nature and implications of trauma.

Anthropology is the scientific study of humanity concerned with human behavior, human biology, cultures, societies, and linguistics in both the present and past. Including past human species, social anthropology studies patterns of behavior.

While cultural anthropology studies cultural meaning including norms and values, a portmanteau term.
